

Module approval flat roof systems: Dome V und Dome Classic

Before using our approval list, please check whether the module you are using is already released in the manufacturer's installation instructions with the type of terminal you are using.

The modules listed below have been approved by the module manufacturers listed here on request by K2 Systems for use with the K2 Dome Classic and Dome V systems for clamping on the short module side.

If this type of clamping is neither in the manufacturer's installation online nor in this release list, please contact us. We will then contact the module manufacturer and talk about a possible release of the respective modules.
